AftabOS.com | BaazarChawk.com
Dari (Native) | English (Fluent)

PROFESSIONAL SUMMARY

Results-oriented data professional and technology entrepreneur with a 4.0 GPA in Computer Science (Cybersecurity specialization) and proven experience designing data architectures, building predictive analytics models, and delivering executive-level business intelligence. As Founder & CEO of Baazar Chawk Afghanistan's first horizontal digital marketplace built and managed a full commercial data infrastructure, customer segmentation framework, revenue analytics dashboards, and KPI reporting systems from scratch. Brings deep Afghan market knowledge, native Dari fluency, and demonstrated ability to lead cross-functional teams and translate complex data into strategic decisions. Passionate about enabling data-driven growth in Afghanistan's emerging digital economy.

CORE COMPETENCIES

Business Intelligence & Reporting	Customer Segmentation & CLV	Predictive Analytics & Forecasting	SQL & Database Management
Executive Dashboard Design	Churn & Retention Analysis	Campaign ROI Measurement	Data Governance & Quality
Revenue & Pricing Analytics	Data Storytelling & Reporting	Team Leadership & Mentoring	Agile Project Delivery

PROFESSIONAL EXPERIENCE

Founder & Chief Executive Officer

2025 – Present

Baazar Chawk — Afghan Digital Marketplace · Miami, FL / Remote (Afghanistan)

- Designed and owned the full commercial data infrastructure for Afghanistan's first horizontal digital marketplace architecting a PostgreSQL/Supabase schema across 10+ business domains (users, listings, subscriptions, advertising, analytics) with automated data validation and integrity enforcement.
- Built a customer segmentation model distinguishing retail buyers, Mandawi wholesale business-tier sellers, and premium subscribers enabling targeted pricing strategy, subscriber lifetime value (CLV) projections, and data-driven acquisition decisions.
- Developed and tracked live commercial KPIs: listing growth rate, user retention, category-level engagement, ad conversion, and subscription uptake creating automated reporting dashboards to surface insights for product and revenue decisions.
- Deployed a WhatsApp AI Knowledge Agent (Chawk Assistant) handling 5 intents in Dari and English via Infobip automating customer behavior data collection, intent analytics, and real-time reporting at scale.
- Led cross-functional agile delivery across engineering, design, and business operations; translated data findings into executive-level strategic decisions on feature prioritization, market expansion, and campaign planning.

Co-Managing Analyst — Student Managed Investment Fund (SMIF)

2023 – 2024

Barry University · Miami Shores, FL

- Applied quantitative financial models (DCF, comparative valuation, sector performance analysis) to evaluate live portfolio revenue trends developing the core analytical muscle behind commercial performance analysis and revenue forecasting.
- Built financial performance scorecards and presented investment recommendations to faculty executives translating raw quantitative data into clear business narratives and actionable decisions, mirroring the executive BI reporting function.
- Conducted market intelligence research on sector trends and competitor performance to inform portfolio strategy directly analogous to telecom competitor benchmarking and market trend monitoring.

AI & Digital Transformation Lab Coordinator

2025 – 2026

Barry University · Miami Shores, FL

- ▶ Led applied ML research applying predictive models (Ridge Regression, LSTM, XGBoost, Random Forest) to financial time-series data building forecasting frameworks directly transferable to subscriber churn prediction, revenue trend modeling, and market opportunity forecasting in telecom.
- ▶ Conducted non-stationary time-series analysis and advanced feature engineering in Python (scikit-learn, Keras, pandas) producing statistical insights comparable to the customer analytics and campaign effectiveness measurement demanded in BI roles.
- ▶ Coordinated research team operations, tracked project KPIs, and reported progress to faculty leadership demonstrating team management, continuous improvement, and executive stakeholder communication in a data-intensive environment.

Student Ambassador Team Lead

2022 – 2025

Barry University · Miami Shores, FL

- ▶ Led a team of student ambassadors, coordinating scheduling, performance tracking, and quality of engagement across university outreach events building foundational team management, people development, and cross-functional coordination skills essential to leading a BI analyst team.
- ▶ Collected, analyzed, and reported engagement metrics and outreach outcomes to university administration designing simple but structured data tracking systems and translating activity data into stakeholder-ready summary reports.
- ▶ Represented Barry University to prospective students and external visitors, developing executive-level presentation and communication skills used to convey complex institutional data in accessible narratives directly applicable to BI data storytelling for senior leadership.
- ▶ Continuously improved outreach materials and processes based on feedback and outcome data demonstrating the change management and continuous improvement mindset the Manager–BI & Analytics role demands.

EDUCATION

Bachelor of Science — Computer Science (Cybersecurity Specialization) *Expected May 2026*

Barry University · Miami Shores, FL

- ▶ GPA: 4.0 / 4.0 Stamps Scholar (Full-Ride Merit Scholarship, top 0.5% of applicants nationally)
- ▶ President's List (5x), Dean's List 2024
- ▶ Relevant Coursework: Applied Cryptography, Database Systems, Data Structures & Algorithms, Network Security, Machine Learning Applications, Statistics
- ▶ Leadership: Founder & President, Barry AI Society | Founder & President, Muslim Students Association (50+ members) | Student Ambassador Team Lead

TECHNICAL SKILLS

Data & Analytics	PostgreSQL · SQL · Supabase · Python (pandas, NumPy, scikit-learn, Keras) · Excel (Advanced) · Statistical Modeling
BI & Reporting	Custom KPI Dashboard Design · Data Storytelling · Performance Scorecard Development · Reporting Automation · Data Governance
AI / ML	Machine Learning (Ridge Regression, XGBoost, LSTM, Random Forest) · Predictive Analytics · NLP · Conversational AI (Infobip)
Development	TypeScript · React · Java · REST APIs · Git · Node.js · Cloudflare Pages · Vite
Languages	Dari Native English Fluent Pashto Conversational

CERTIFICATIONS & CONTINUING EDUCATION

- ▶ Agentic Conversational AI Infobip (Completed June 2025): Built live WhatsApp AI agent (Chawk Assistant) handling 5 intents in Dari/English; passed Quality Center testing
- ▶ Applied Cryptography Barry University CS-478: Advanced coursework in encryption, key management, and secure systems
- ▶ Currently pursuing: Microsoft Certified Data Analyst Associate (Power BI) in progress
